

KUMAR SACHIN

sachinkc4456@gmail.com | +91-8602948023 | [GitHub](#) | [LinkedIn](#)

“**Aspiring Software Engineer** currently pursuing B.Tech in CSE with a strong foundation in data structures, algorithms, and systems development. Passionate about scalable software, open-source contribution, and solving real-world challenges.”

Education

Central university of Jammu, Jammu & Kashmir, India	2024 - present
• Bachelors of Technology in Computer science & Engineering	
D.A.V. Public School, India	2022 - 2024
• AISSCE (Class XII), Aggregate:90.8%	
D.A.V. Public School, India	2010 - 2022
• AISSE (Class X), Aggregate:94.2%	

Skills

C++ | C | Java | Python | Machine Learning | JavaScript | NodeJS | React | MongoDB | MySQL | Git

Work Experience

Cent Stage by Gulsher Kooner Full Stack Developer INTERN	May'25 - present
• Developed and optimized full-stack features using React.js, Node.js, and MongoDB , enhancing application scalability and responsiveness.	
• Implemented CI/CD pipelines with GitHub Actions , reducing deployment time and improving release reliability.	
Google Developers Group CUJ Lead	Aug'25 - present
• Mentored 500+ students in web development, modern frameworks, and coding best practices, improving technical proficiency.	
• Led the development of the official GDG CUJ website , boosting community engagement and digital presence.	
• Organized workshops and collaborative projects , fostering innovation and peer-to-peer learning in the developer community.	

Projects

REVO – Healthcare Emergency Platform (React.js, Node.js, MongoDB, Socket.IO, Google Maps API)	Feb'25
Real-time platform connecting patients with nearby doctors and ambulances.	
• Built a real-time healthcare platform connecting patients with nearby doctors and ambulances, improving emergency response times.	
• Developed location-based services reducing response latency by 30% .	
• Designed and deployed a scalable, secure system handling real-time communication and patient data.	
Traffic Flow Optimization Using IoT & Data Science (IoT Sensors, Python, AI/ML, Predictive Analytics)	Feb'25
Smart traffic management using IoT sensors and predictive analytics.	
• Designed a smart traffic management system leveraging IoT and AI-driven models for urban mobility.	
• Collected and processed real-time sensor data to optimize traffic signals and reduce congestion.	
Automated Smart Wheelchair (Arduino, Sensors, Bluetooth, Voice Recognition, Pulse Oximeter)	Feb'19
multi-mode wheelchair with smart features for improved accessibility.	
• Supported gesture, Bluetooth, and voice control.	
• Included pulse oximeter and obstacle detection for safety and health tracking.	

Academic and Extracurricular Achievements

- Won IIC Hackathon in 2025
- Won Website Design challenge by Code Connect CUJ in 2024
- Top 3 in Inspire Award Manak National Level.

Positions of Responsibility

GDG CUJ Organizer	Aug'25 - Present
• Facilitated knowledge-sharing by leading interactive workshops , tech talks, and hands-on sessions.	
• Acted as a key communication bridge between core organizers and student developers, ensuring effective mentorship, clarity of technical guidance , and continuous peer learning through structured mentoring programs.	
Tech Event Organiser	Apr'25
• Acted as a bridge between faculty and students, addressing academic concerns.	
• Organized discussions and study sessions to enhance peer learning.
